**LeCHASE'S ROLE:**

Construction Manager

**VALUE:**

\$45 million

**SCHEDULE:**

April 2008 to August 2009

**PROJECT DESCRIPTION:**

This project consisted of renovating a 220,000 SF, 100-year-old manufacturing building for office space to accommodate approximately 500 engineers for GE's Renewable Energy Headquarters. The project schedule included design, construction and commissioning of the building. The scope of work included 15 acres of sitework, building demolition, remediation and renovation for office and data center space.

The state-of-the-art, eco-friendly facility included an advanced wind turbine monitoring and remote operations center. This project is LEED® Silver Certified.
